EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Curran (Reg. No. 50,664) on 12/11/2008.

The claims have been amended as follows:

20. The system of claim 19, wherein the read-to-own transaction also includes an additional address packet sent on the additional address network and at least one message sent on the inter-node network.

22. The system of claim 20, wherein the additional interface is configured to broadcast an invalidating address packet on the additional address network in response to receiving a message indicating the read-to-own transaction from the interface via the inter-node network.

24. The system of claim 20, wherein the processing subsystem is configured to initiate the read-to-own transaction by sending a read-to-own packet on the address network.

25. The system of claim 24, wherein no memory subsystem included in the node maps the coherency unit;

wherein in response to a read-to-own packet on the address network, the interface is configured to send a read-to-own message to the additional interface in the additional node.

Reasons for Allowance

Claims 19,20,22-27, and 35-42 (renumbered 1-16) are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As per claim Claims 19 and 35, the prior art does not specifically teach or suggest, either alone or in combination, all of the limitations of the present independent claims. Specifically, the prior art of record does not explicitly teach the combination of (1) transitioning an access write to a coherency unit in response to receiving a data packet of request data while transitioning an ownership responsibility for the coherency unit in response to receiving an address packet that corresponds to the data packet on the address network, where the address and data packets are both part of the same read-to-own transaction initiated by the processing subsystem and (2) delaying the data packet on the data network by the interface until the interface receives notification that all shared copies of the requested coherency unit have been invalidated.

Hagersten teaches a method for performing a Read-to-own transaction but does not teach the exactly methodology as claimed by the presently drafted independent claims.

Claims 20,22-27, and 36-42 are allowable as being dependent upon an allowable base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHANE M. THOMAS whose telephone number is (571)272-4188. The examiner can normally be reached on M-F 8:30 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matt M. Kim can be reached on (571) 272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
